SEALING LIQUID MONITOR

Accurate • Efficient • Reliable

STOP POURING MONEY DOWN THE DRAIN

Reduce water consumption and increase life of seal

Adequate cooling and lubrication are essential for any kind of seal.

The SLM has been especially designed for applications on pumps and mechanical seals where uninterrupted seal water flow is required.

Proper adjustment of flow and pressure will result in water and energy savings.

Easy maintenance reduces down time

The built-in cleaner is designed not to interfere with operation.

It effectively removes built-up contaminants.

The long, clear metering scale guarantees visibility and easy inspection of flow level.

Innovative design offers durability and flexibility

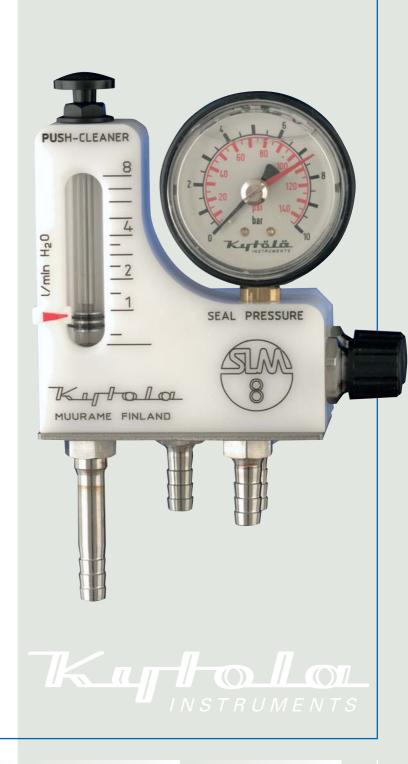

The strong and compact design ensures maximum resistance to external impact.

The SLM has been specially optimized to withstand contaminated water.

Reliable and accurate flow measurement is based on a variable area metering principle using a free-floating float.

The various sealing liquid monitor models quarantee compatibility with all seal types.

The sealing liquid monitor can also be easily equipped with an alarm output by utilizing an inductive proximity sensor.

FEATURES:

- Reliable operation
- · Solid construction
- · Reduced seal maintenance
- Built-in cleaner does not interfere with operation
- Excellent corrosion and heat resistance
- All models are alarm-ready
- Clear metering scale

PARTS INCLUDED:

- Clog resistant flow control valve
- Hose barb connectors (straight tube connectors for compression fittings on request)
- Mounting bracket
- · Built-in tube cleaner

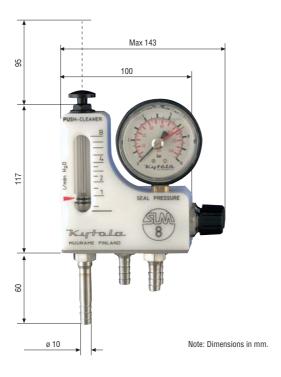

ACCESSORIES:

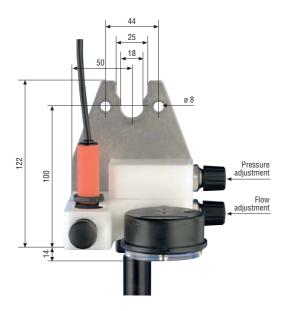

- Pressurizing valve for double mechanical seals
- Pressure gauge
- · Floor mounting stand
- Hoses and hose barb connectors for pump
- Check valve
- · Alarm sensor

TYPICAL APPLICATIONS:

- Single and double mechanical seals
- Gland packings
- Flushing water applications
- Purging applications
- Other flow measurement applications
